ARUN KUMAR R

Full Stack Developer | React • Java (Microservices) • AI

Chennai, India | +91 9840453448 | arunamsce@gmail.com | linkedin.com/in/arun-kumar-dev

6+ years experience | Indian

PROFESSIONAL SUMMARY

- Accomplished professional with **6+ years of Full-stack development experience** in shipping enterprise SPAs and high-volume REST APIs.
- Drove end-to-end feature ownership across frontend and backend systems, shipping clean, maintainable code
- Optimizes application performance, owns CI/CD and container deployments, and keeps production observability tight.
- **Built AI automation workflows**, production ready LLM agents with RAG, tool calling, and guardrails alongside core full-stack delivery.
- Works in **Agile/Scrum**, reviews code, mentors junior engineers and coordinates with product and business stakeholders.

CORE SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), Redux, Tailwind CSS, HTML5

Backend: Java, Spring Boot, Microservices

AI: AI agents, LLM integration, LangChain, LangGraph, RAG, embeddings, vector search, reranking, tool calling

Data: MySQL, SQL Server, Redis, MongoDB

Testing: Jest, Playwright, Mockito, JUnit, Postman

DevOps & Cloud: Docker, Kubernetes, Jenkins, Git, GitHub, SVN, AWS (EKS, S3, EC2, Lambda, CloudFormation)

Observability: ElasticSearch, Logstash and Kibana (ELK), Splunk, Grafana, Prometheus

Engineering: API design, load handling, caching, modular architecture, scalability patterns, Agile/Scrum, code reviews

PROFESSIONAL EXPERIENCE

Comcast India Engineering Center (CIEC) LLP, Chennai, India **Sep 2024 – Present**

Development Engineer 3

- Led full-stack delivery of new features in **React and Java Spring Boot,** including critical fixes and performance improvements across end-to-end REST workflows in **distributed microservice** systems supporting the Sky Q platform, which delivers content to millions of set-top boxes across the UK, Italy, and Germany.
- Administer Jenkins CI/CD and containerized deployments with Docker and Kubernetes. Improve observability through logging, monitoring and alerting.
- Architect **LLM-driven agents** with RAG, orchestrating tool use and resilient pipelines for business-critical workflows with deterministic fallbacks.
- Implement **Spring Security** with OAuth 2.0 and JWT, enforcing IAM-aligned access control and PKCE for hardened token flows.
- Led the migration of legacy infrastructure to AWS EKS, containerizing key services, implementing CI/CD pipelines, and improving deployment frequency and system resilience.
- Harden application security with **Snyk SCA/code scanning**, remediating OWASP findings by patching dependencies and upgrading React and Spring.
- Keep code quality high through unit tests, reviews and agreed engineering standards. Sync with stakeholders and propose solutions for blockers.

Achievements

- Migrated core legacy Flash application to a modern React 18 application with component-based architecture, resulting in improved performance, better maintainability, and a more scalable frontend.
- Spearheaded an AI program-replacement flow with LLM pipelines, cutting editor turnaround from hours to seconds (about 95% faster) and **reducing operational costs by $50,000.**
- **Built a RAG agent** that answers CMS queries and tool-calls internal APIs when asset data is missing — cutting the email-and-coordinate loop by 60%.
- Optimized CMS application with React.memo and code-splitting, reducing initial load from **20s to 2.5s** and improving responsiveness for 5000+ users by 70%.

Celebrus Technologies PLC, Chennai, India **Jun 2020 – Sep 2024**

Software Engineer · Nov 2023 – Sep 2024

- Designed and developed React JS monitoring dashboards using PatternFly (Red Hat open-source design system) with a Spring Boot and Spring MVC backend to deliver scalable, enterprise-grade data visualization and operational insights.
- Implemented a Server-Driven UI architecture where Spring Boot APIs returned both data and component metadata, enabling the React frontend to dynamically render dashboards
- Applied OOP design patterns and SOLID principles, along with unit testing (JUnit 5), refactoring, and code reviews, to reduce complexity and maintain high code quality.

Junior Software Developer · Mar 2021 – Nov 2023

- Built React features from scratch using reusable components, forms and tables for CRUD, applying the Higher-Order Component pattern.
- Architected and built the Celebrus CDI for Salesforce from scratch using **Node.js as the backend** and a Higher-Order Component (HOC) architecture in React to deliver reusable, scalable dashboard components with consistent UI patterns across the platform.
- Performed Bug fixing and resolving production issues.

Software Engineer Trainee · Jun 2020 – Mar 2021

- Engineered a Production-ready HR management application with Java, JSP and Servlets, enhancing company-wide HR operations.
- Implemented Content Security Policy (CSP) and addressed various security vulnerabilities using OWASP.

Achievements

- Implemented a remote license fetching and session usage prediction feature using Machine Learning that retrieved real-time license data from customer deployments. This enabled support and sales teams to take proactive actions, improving customer retention and supporting revenue growth.
- Rebuilt a responsive React table component using custom hooks and React 18 features, eliminating all legacy tables and improving data loading performance by 40%.

Amazon, Chennai, India **Dec 2018 – Sep 2019**

Machine Learning Data Associate

- Applied data-labeling workflows across text, speech, and multimodal datasets for voice-enabled devices, ensuring consistent annotation quality and reliable training data across all content types.

EDUCATION

Bachelor of Engineering — Anna University, Chennai, India · 2014–2018

LANGUAGES

English — Fluent · Tamil — Fluent

PERSONAL SKILLS

- Coordinates with product and business teams and provides clear status updates.
- Strong analytical skills to diagnose and resolve issues with minimal disruption.
- Automates recurring team processes to cut manual work.
- Adapts quickly to new technologies and keeps skills current.
